

# Press Release ANGELS

## **ANGELS, a new European research project, a gateway to the future.**

ANGELS project (Augmented Reality Network Generating Learning on Safety), is the training system that will revolutionize education and learning on safety and health at work, particularly in the hospital facilities.

This tool aims at innovating in terms of training on health and safety at work with the use of augmented reality (computer system that can superimpose 3D image on a real image to combine real and virtual).

ANGELS introduces 4 key innovations: A practice adapted to an innovative new technology, a realistic assessment in tune with the XXI<sup>st</sup> century in the area of education and training, a large field of application in the health care facilities and the creation of a starter kit for public and private organizations, training centers and academic centers.

This project is run by the University Hospital « Fondazione PTV Policlinico Tor Vergata » in Rome, Italy, and the consortium also includes the Management and Human Resources company MF & PARTNERS CONSULTING, the Italian Human Resources and Development firm Entropy KN, the Italian computer company Inglobe Technology (IT), the training center in paramedical care NCONZO in Brno, Czech Republic, and the applied psychology, clinical psychology and biopsychology department of the Spain university of Jaume 1 in Castellon, near Valencia.

The first meeting for this project was held on March 1<sup>st</sup> and 2<sup>nd</sup> in Rome, Italy.

## **MF & PARTNERS CONSULTING develops in the e-learning**

MF & PARTNERS CONSULTING is a Management and Human Resources Company set up in 2000 that since 2005, specializes in the design of e-learning tools and serious games. The company regularly participates in European project focused on innovation transfer and innovation in the lifelong education and training field.
